ESNOPER CLIP
Glaucoma Implant

Reference | VCLIP-AJL | Brand name | ESNOPER CLIP
--- | --- | --- | ---
Definition | ESNOPER CLIP uveoscleral implant. | |
Indication | The ESNOPER CLIP uveoscleral implant is indicated for non-penetrating deep sclerectomy (NPDS) in open-angle glaucoma surgery. | |
Product description | The ESNOPER CLIP is a non-reabsorbable implant whose double-plate design provides two drainage channels: Trabecular (intraescleral and supraciliary) and uveoscleral. For implantation, the notched plate must be inserted in the supachoroidal space and the upper plate is positioned on the scleral bed. The lateral notches mean the implant can be secured perfectly, thus preventing movement without the need for sutures. | |
Dimensions | 5.50mm X 1.30mm X 2.20mm. | |
Orifices | 2 (drainage). | |
Material | Hydroxyethyl Methacrylate (HEMA). | |
Sterilisation method | Steam. | |
Supply | The ESNOPER CLIP implant comes in an individual sterile vial housed in a clamp support and immersed in a liquid medium to maintain proper device hydration. | |
Quality Assurance | CE 0434 marking. | Shelf-life | 3 years

EPNP surgical equipment

Definition | EPNP Kit (non-penetrating deep sclerectomy). | |
Brand name | KIT EPNP | Product code | AJL- KIT-001
Description | The EPNP Kit is presented in a rigid plastic blister in which the following references are grouped (*): | |
| | • EPNP-2001 Liebermann Blepharo 14mm. | • EPNP-2004 Mermoud Clamp. |
| | • EPNP-2002 Double Scleral Marker. | • EPNP-2005 Curved micro-scissor. |
| | • EPNP-2003 Mermoud Spatula. | • PST-4600A Sterilisation box (10x16x2 cm). |

* The instruments can be supplied as a set (EPNP Kit) or separately.
